Course Description

Why do members of society behave the way that they do? Are we simply creatures of rational choice? Do our biological and psychological compositions largely dictate our actions? How does society affect our behaviour? What is sociology and how does it aid us in explaining human behaviour? We will explore these questions through our readings and congenial class discussions. As I expect students to be active producers rather than passive consumers of idea, there will be considerable class time to analyze and discuss these issues. Upon successful completion of Introduction to Sociology, students will be able to think

critically about social issues and events, demonstrate familiarity with key concepts in the discipline, and display a practical ability to apply major theoretical perspectives to social processes.

Course Objectives/Learning Outcomes

Students in Introduction to Sociology should concentrate on how to:

1. Outline the five general sociological perspectives (functionalism, conflict theory, symbolic interactionism, feminisms, and post-structuralism), and apply them to social interactions and structures.
2. Differentiate between micro-level, macro-level, and global-level sociological approaches.
3. Explain the epistemological bases of different types of sociological knowledge and the basic methods used to generate knowledge.
4. Outline the most prominent explanations on how socialization and culture form our social selves.
5. Explain how social stratification, “race” and ethnicity, and sex and gender affect social opportunities.
6. Differentiate how the classic sociological thinkers approached religion in society.
7. Briefly outline the main sociological explanations influencing involvement in crime and deviance.
8. Identify the main ways in which urbanization, population, and the environment are changing our social world.
9. Assess the possibilities for inducing positive social change.

Schedule of Lectures and Readings

See “Schedule of lectures and readings” on D2L.

Methods of Assessment and Grading Weights

There are several opportunities for students to capture their grades. Students will have two mid-term examinations in true-false and multiple choice format. The mid-term examinations are both worth 30%, and they are not cumulative. Mid-term examinations will be held in our regular lecture theatre. All lecture and reading material is subject to evaluation. Therefore,

it is important that students attend all classes and examine every reading in order to meet the demands of this course.

Final Exam Information

The final examination is worth 40% and will also be in true-false and multiple choice format.

Grading Scale

Letter grades will be assigned and submitted to the registrar based on the following scale:

Grade	Percent range	Grade Point Value	Description

D	50 – 54.99%	1.0	Minimal Pass. Insufficient preparation for subsequent courses in the same subject.
F	<50%	0	Failure. Did not meet course requirements.

Passing Grades

In order to pass the course, students must obtain 50% or more overall as per the grading scale.

Grade Reappraisal

Within two weeks of the date the exam/assignment is returned, students seeking reappraisal of examinations or assignments must submit a written response to the instructor explaining the basis for reconsideration of one's mark. The instructor will reconsider the grade assigned and will then book a time with the student to discuss his or her work and rationale. It should be noted that a re-assessed grade may be raised, lowered, or remain the same.

Technology Use

Electronic devices are common in classrooms. While they can be very effective in assisting students in the learning process, they can also be very distracting if not used properly. Students are encouraged to reflect on how their use of electronic devices affects their learning and how it affects others around them.

Inclusivity

We live in a diverse social world. Although diversity is often considered visible, that is often not the case. We frequently do not know what challenges others face because all aspects of their lives are simply not visible. Some students may live with a physical disability that is not always apparent, manage a learning disability, face anxiety and depression, or deal with internalized homophobia or transphobia. While it is impossible to know everyone's wants and needs, it is possible and important to generate an atmosphere of mutual respect and support. Student Accessibility Services provides examination accommodation for those who need it. In class, students should feel free to make the instructor aware of their preferred form of reference, and ideas on how to create a more effective and welcoming learning environment for everyone.

Handing in Papers, Assignments

The main Sociology Department office does not deal with any course-related matters. Please speak directly to your instructor.

Protection of Privacy: The Freedom of Information and Protection of Privacy (FOIPP) legislation does not allow students to retrieve any course material from public places. Anything that requires handing back will be returned directly during class or office hours. If students are unable to pick up their assignments from the instructor, they can provide the instructor with a stamped, self-addressed envelope to be used for the return of the assignment. Private information related to the individual student is treated with the utmost regard by the faculty at the University of Calgary

Final grades are not posted by the Sociology Department. They are only available online.

Research Ethics

Students are advised that any research with human subjects – including any interviewing (even with friends and family), opinion polling, or unobtrusive observation – must have the approval of the Faculty Ethics Committee. In completing course requirements, students must not undertake any human subjects research without discussing their plans with the instructor, to determine if ethics approval is required.
